

## CHOLINE CHLORIDE

### USE:

- Growth promoter
- Gut modifier.
- Liver Health

*Inclusion depends on formulation*

## OTHER PRODUCTS

- Yellow York and Egg color.
- Enzymes (Nutrizyme, Habio phytase, Habio Multienzyme.)
- Mintrex Diary.
- Precalf Pellets.
- Vitamin C Coated and non-Coated for Fish.
- Cattle mineral blocks
- Threonine
- Tryptophan
- Cysteine
- Disinfectants
- Feed antibiotics
- Antioxidants
- RIDO of MITE
- Mineral Blocks

## APSA AMINOVITAL

- Improved production
- Improved growth rate
- Optimize vitamin balance
- Best vitamin supplement

## APSA POLIVIT AD3EKC

- Prophylaxis & Treatment of deficiencies
- Immunity booster
- Promotes Intestinal absorption of calcium
- Normal bone growth & development
- Enhances immune mechanisms

## POLIVITSEL

- Vitamin supplement with large amounts of selenium important in antibodies and maintain a healthy heart and liver.
- Sufficient amount of vitamin E and selenium key in Muscular function and boosting immunity.

## CARMINO PLUS

- Powder water soluble vitamin to meet the vitamin requirements of the animal.
- Used in periods of intense stress

## MCP / DCP /APSA PHOS-CAL (Liquid calcium)

- Better calcium availability
- Improved shell quality
- Prevention of cannibalism like calcium-based pecking
- Better skeletal strength

## OXYDAFORT (BHT ANTIOXIDANT)

- For the preservation of easily oxidized nutrients like vitamins and other materials susceptible to oxidation

## APSA HEPATOCHEM Li

- Specific supplement that supports liver and kidney metabolism

## SODIUM BICARBONATE

- For Ph buffering in the lower gut.
- For the control of coccidia

## APSA MINT

- Reduces the side-effects of vaccination
- Support on medication of respiratory problems
- Provides preventive treatment during pouts' reception in farms

## EQUIPMENTS

Electric Debeakers

Poultry Debeakers

Poultry Nipples

Rabbits Nipples

Poultry Feeders

Poultry Cages

Bell Drinkers

Installed Piggery Nipples

- BTS resonator for automated Hatchery egg disinfection.
- Gas Infrared brooder Heating equipment.
- Kenocell Machines for Mastitis Somatic Cell analysis

Udder dip cups for mastitis control in dairy animals

**nutri nova**  
 Nutrition Health Profitability

**“Global Presence, Local Solutions”**

Nutrinova limited is the leading conventional Animal nutritional solutions supplier in Uganda and the first fully fledged nutritional company in Uganda.

The experience of distribution and knowledge of over 8 years in the Animal nutrition field has brought us in touch with International accredited suppliers of Nutritional solutions. We are among the biggest Biosecurity companies with our partnership with Global biosecurity companies like CID lines and Neovia. We have great experience in handling the pains and challenges of sub-Saharan farms.

### METHIONINE MHA

#### USE:

- To promote growth, production and welfare of birds
- Increased egg size & shell quality
- Improved egg production
- Source of organic calcium
- Improve feather growth
- Reduce heat stress in birds

*Inclusion 1kg per ton of finished feeds*

### TOXINBINDER

#### USE:

- Secure liver against toxins
- To neutralize moulds in the feeds
- Increase and maintain immunity of livestock.
- Preserves feeds for long periods

*Inclusion 1kg or 2kg per ton of finished feeds depending on the challenge*

*Available brands; Toxiban (USA), Minazel (Serbia), TSX (FRANCE)*

### LYSINE

#### USE:

- Muscle Improvement
- Improved growth rate
- More meat deposition

*Inclusion 1kg/ per ton of finished feeds*

### SALINOMYCINE 12%

#### USE:

- Prevents coccidiosis (brown and red watery stool)
- Use in young birds up to 5 weeks in brooders and up to three months in layers. Do not use in lay.
- Improves production

*Inclusion 0.5kg per ton finished feed- 12%.*

### ACIDOMIX

#### USE:

- Help fight against salmonella and ecoli.
- (Green,yellow,white watery diarrhea)
- Reduces dependence on drugs by promoting gut health.
- Improves digestion & utilization of feeds.

### MONO CALCIUM PHOSPHATE (DCP) GRANULAR

#### USE:

- To provide extra calcium Carbonate and phosphorus in the feeds
- To improve growth, production and fertility in poultry and other animals

*Inclusion depending on formulation.*

### CIBENZA

#### USE:

- Improve feed consumption and utilization.
- Maximize the use of grains in feeds.
- Improves production and growth in the birds.
- Reduce impact of soya beans in feed cost.

*Inclusion 250g per ton finished feed.  
Nutrzyme.500g per ton finished feed*

### LIME STONE

#### USE:

- To provide calcium carbonate in the feeds
- To improve growth & other metabolic processes

### PREMIXES

#### USE:

- Provide micro elements necessary for feeds.
- Provides trace minerals and salts necessary for feeds.
- Improves production and growth.
- Inclusion depending on type.
- **Multi-breeder premix** 2.5kg per ton.
- **Broiler premix** 2.5 kg per ton.
- **Patent Layer premix (with enzymes)** 5 kg per ton.
- **Grower premix** 2.5kg per ton.
- **Fish premix** 2.5 per ton.
- **Chick premix** 2.5 per ton.
- **Sow and Weaner premix** 2.5 per ton.
- **Evimix Layer premix** 2.5 per ton.

### MINTREX

#### USE:

- Optimizes milk solids, such as fats and proteins
- Promote productivity
- Enhance herd health
- Optimize trace mineral status and maintain milk components

*Inclusion mintrex 14 grams per cow per day*

### NUTRIPHOS MAZIWA

A specially formulated mineral supplement for dairy cattle that helps in the growth of calves & also improves milk production in lactating cows. Feed premium Nutriphos maziwa preferably with dairy meal or top dress on dry feeds

#### USE:

- **Adult cows:** 120g daily for maintenance & 15g per litre of milk produced
- **Heifers :** 60g daily
- **Calves:** 30g daily

### CONCENTRATES & MACROPACKS

A whole range of concentrates and macro packs tailored to the client needs.

### VIROCID

- The world's strongest disinfectant with double strength.
- Used along the whole food chain against the most resistant micro-organisms.
- Active against stubborn organisms like Swine Fever, Avian Flu H2N5, Gumboro and coccidiosis.

*Inclusion 50mls / 20ltrs*

### KENOCOX

The special disinfectant for:

- Effective against oocysts, sporulated oocysts
- Unique formula without Phenol

### PIG GROW

#### USE:

- Increase growth rate
- Reduced mortality
- Improved Health

*Inclusion 1kg per 100kg*

### CID 2000

- The hydrogen peroxide and organic acid blend for flushing and cleaning drinking lines. Ensures that your water lines are clean and also your livestock revives clean water. Not to use for ruminants.

### KENOSAN

Non detergent cleaner that removes invisible dirt ensuring that disinfectant work to their potential.
